as the commander of u s central command general frank mckenzie
oversaw some of the most important and controversial operations
in modern u s military history he had direct operational
responsibility for the strikes on qassem soleimani and two
successive leaders of isis the many months of deterrence
operations against iran and its proxies and the methodical
drawdown in iraq he directed the noncombatant evacuation
operation in afghanistan and our final withdrawal from that
tortured country the melting point has three themes the first one
is the importance of the primacy of civilian control of the
military it has become a widely perceived truth that this control
has been eroded over the past few years general mckenzie doesn t
believe that to be the case and he speaks with some authority on
the matter arguing that the civ mil relationship isn t perfect or
frictionless but it doesn t have to be and probably shouldn t be
it is however more durable than many believe and is supported and

embraced by the military to a degree that some critics do not choose to recognize the second theme is the uniqueness of being a combatant commander combatant commanders participate in the development of policy although as junior partners they are also responsible for the execution of policy once civilian leaders have formulated their decision a unique position and very different than the role of a service chief or even the chairman of the joint chiefs of staff none of these officers are in the chain of command and they have no ultimate mortal responsibility or authority for execution only the combatant commander stands astride the boundary of decision making and execution finally the third theme that mckenzie argues is that leaders matter and the decisions they make have a profound effect on what happens on the battlefield mckenzie provides an honest assessment of his time in command describing decisions that were sound as well as some outcomes he wishes were different he offers a vivid portrait of leadership in action in one of the most volatile regions of the world
